

Examining Quantum Algorithms for Quantum Image Processing

Part of the Advances in Computer and Electrical Engineering Book Series

HaiSheng Li (Guangxi Normal University, China)

Description:

An emerging interdisciplinary field of study in the realm of academia has been quantum computing and its various applications. The rapid rate of progress of this advancing technology as well as its multi-faceted nature has created a vast amount of potential research material for professionals and students in numerous disciplines. Its specific ability to improve upon traditional algorithms for image processing is seizing the attention of researchers in this field, as there remains a lack of exploration into this precise area.

Examining Quantum Algorithms for Quantum Image Processing is an essential reference that provides research on quantum Fourier transform, quantum wavelet transform, and quantum wavelet packet transform as tool algorithms in image processing and quantum computing. It provides a comprehensive look into quantum image algorithms to establish frameworks of quantum image processing. While highlighting topics including geometric transformation, quantum compression ratio, and storage circuits, this book is ideally designed for researchers, scientists, developers, academicians, programmers, practitioners, engineers, and upper graduate students.

ISBN: 9781799837992

Pages: 215

Copyright: 2021

Release Date: September, 2020

Hardcover: \$195.00

Softcover: \$150.00

E-Book: \$195.00

Hardcover + E-Book: \$235.00

Topics Covered:

Geometric Transformation
Grover Search Algorithm
Image Compression Algorithms
Multidimensional Images
Orthogonal Rotation
Quantum Algorithm
Quantum Compression Ratio (QCR)

Quantum Fourier Transform
Quantum Image Representation
Quantum Mechanics
Retrieval Methods
Signal Processing
Storage Circuits
Wavelet Packet Transforms

Subject: Computer Science and Information Technology

Classification: Authored Reference

Readership Level: Advanced-Academic Level (Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners

Order Information
